INFORMATION TO HELP DETERMINE AMOUNT OF PLANTING STOCK:

Measure area to be planted in square feet and order one rootlet or plug for each square foot of area. Faster coverage can be obtained by setting plants closer than twelve inches, however our general recommendations are to plant all grasses on twelve inch centers. Plant centipede seed at the rate of 4 ounces per 1,000 square feet. Plant ZOYSIA JAPONICA seed at the rate of 2 pounds per 1,000 square feet. Border plants should be planted 12 inches apart. Rootlets are shipped in solid sod form so as to arrive in top condition. Sod should be divided according to instructions upon arrival.

THOSE SEEKING PERSONAL ADVICE WILL RECEIVE SAME PROMPTLY IF WITH THEIR QUESTIONS THEY WILL ENCLOSE ONE DOLLAR TO COVER TIME, POSTAGE AND SUPPLIES NEEDED TO REPLY.
